

QUESTIONS 22 / 31 completed

Arithmetic

ARITHMETIC

Write a Java program that takes two integers as input from the user and calculates their sum, difference, product, and quotient using arithmetic operators.

PROGRAM EDITOR

Java

Run

Save

INPUT

```
1 import java.util.*;
2 public class main
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc = new Scanner(System.in);
7         int a = sc.nextInt();
8         int b = sc.nextInt();
9         System.out.println("Sum: " + a+b);
10        System.out.println("Difference: " + (a-b));
11        System.out.println("Product: " + a*b);
12        System.out.println("Quotient: " + a/b);
13    }
14 }
15 }
```

OUTPUT

```
Sum: 45
Difference: -1
Product: 20
Quotient: 0
```

QUESTIONS 22 / 31 completed

MAX

MAX

Write a Java program to find the maximum of three numbers using conditional statements.

PROGRAM EDITOR

Java

Run

Save

INPUT

```
1 import java.util.*;
2 public class Main
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc = new Scanner(System.in);
7         int n = sc.nextInt();
8         System.out.println("enter the numbers: ");
9         int num=sc.nextInt();
10        int max=num;
11        for(int i=2;i<=n;i++)
12        {
13            num = sc.nextInt();
14            if(num>max)
15            {
16                max = num;
17            }
18        }
19        System.out.println("Maximum value: "+max);
20    }
21 }
```

OUTPUT

```
enter the numbers:
Maximum value: 18
Minimum value: 2
```

QUESTIONS 22 / 31 completed

Leap

LEAP

Write a Java program to check whether a given year is a leap year or not using conditional statements.

PROGRAM EDITOR

Java

Run

Save

INPUT

2004

```
1 import java.util.*;
2 public class main
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc = new Scanner(System.in);
7         int year = sc.nextInt();
8         if(year % 400 == 0 || (year % 4 == 0 && year % 100 != 0))
9         {
10             System.out.println(year+" is Leap year");
11         }
12         else
13         {
14             System.out.println(year+" is not Leap Year");
15         }
16     }
17 }
```

OUTPUT

2004 is Leap year

QUESTIONS 22 / 31 completed

Fibonacci

FIBONACCI

Write a Java program to print the Fibonacci series up to a given number using loops.

PROGRAM EDITOR

Java

Run

Save

INPUT

8

```
1 import java.util.*;

29            System.out.println("Not a Armstrong number");
30        }
31    }
32 }
33 }
```

OUTPUT

Not a Armstrong number

QUESTIONS 22 / 31 completed

Power

POWER

Write a Java program to find the power of a number using loops and conditional statements.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.*;
2 public class main
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc = new Scanner(System.in);
7         int base=sc.nextInt();
8         int exponent = sc.nextInt();
9         int power=1;
10        System.out.println(base +" power "+exponent+"= "+Math.pow(base,exponent)); //inbuilt
11        //using loop
12        for(int i=1;i<=exponent;i++)
13        {
14            power = power*base;
15        }
16        System.out.print("power: "+power );
17    }
18 }
```

OUTPUT

```
2 power 0= 1.0
power: 1
```

INPUT

```
2
0
```
