

MAX

Write a Java program to find the maximum of three numbers using conditional statements.

```
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc=new Scanner(System.in);
7         System.out.print("enter first number:");
8         int a=sc.nextInt();
9         System.out.print("enter second number:");
10        int b=sc.nextInt();
11        if(a>b)
12            System.out.println("Maximum:"+a);
13        else
14            System.out.println("Minimum:"+b);
15    }
16 }
```

OUTPUT

```
enter first number:enter second number:Minimum:3
```

QUESTIONS 31 / 31 completed

Arithmetic

ARITHMETIC

Write a Java program that takes two integers as input from the user and calculates their sum, difference, product, and quotient using arithmetic operators.

PROGRAM EDITOR

Java

Run

Save

```
1 import java.util.*;
2 public class arithmetic
3 {
4     public static void main(String[] args)
5     {
6         Scanner sc=new Scanner(System.in);
